If the ratio's that stand today of the SL Tamil populace, was also the same in 1824, even with a 10% growth rate. Would show these results:

							North(95%)	East(40%)
						1829	141,603	18,656
						1839	155,763	20,522
						1849	171,340	22,574
						1859	188,474	24,832
						1869	207,321	27,315
						1879	228,053	30,046
						1889	250,858	33,051
						1899	275,944	36,356
						1909	303,539	39,992
						1919	333,892	43,991
<u> 1824 Census</u>						1929	367,282	48,390
Total in Malabar Districts	195,697					1939	404,010	53,229
						1949	444,411	58,552
			1824		2009	1959	488,852	64,407
Jaffna	123,188					1969	<i>537,737</i>	70,848
Mannar	22,436	149,056		787,301		1979	591,511	77,932
Delft	3,432		<u>195,697</u>		<u>891,029</u>	1989	650,662	<i>85,726</i>
Batticoloa	27,483	46,641		103,728		1999	715,728	94,298
Trinco	19,158					2009	787,301	103,728
							95%	
							141,603	18,656.40

	Today
Total Population	21,000,000
Natural Malabar Populations	4.24%

Its clear from the results, it was due to other methods, other than natural growth, gave rise to today's 2,000,000 plus SL Tamil populace.
